

MINER
FAMILY WINERY
NAPA VALLEY

Miner Family Winery Sanitation Practices

- Guests will be required to wear masks except for when seated for a tasting.
- Appointments will be staggered so only one group is entering and exiting the building at any one time.
- Tasting spaces and tables will be left vacant for at least 1 hour after a group has used the space to allow ample time to sanitize between appointments.
- Groups will have one dedicated host for the duration of the visit to eliminate exposure to other guests and employees.
- Groups will be tasting in a private tasting space with no other guests present.
- All tasting collateral will be disposable and single use.
- Guests will be given a clean, sanitized glass for each wine tasted. Wine tastings will be pre-poured before the guest arrives on property.
- Employees are required to report if they are encountering any COVID symptoms and will be asked to home quarantine.
- Hosts will practice social distancing and wear masks at all times.
- Hand sanitizer stations will be readily available in guest and employee spaces.
- Glassware will be cleared immediately after guest departure and washed and sanitized in industrial Hobart dishwasher.
- Contact surfaces such as doorknobs, light switches, bathroom fixtures, faucet handles, and other surfaces should be disinfected on regular intervals.
- Employees will wear gloves when setting up and clearing tasting spaces.
